

Unit 9 – Day 10
GRAPHING RADICAL EQUATIONS HW

(#1-9) Match the equation with given graph.

I 1) $y = \sqrt{x} - 3$

A 2) $y = \sqrt{x - 3}$

H 3) $y = \sqrt{x + 3}$

G 4) $y = \sqrt{x} + 3$

F 5) $y = -\sqrt{x}$

C 6) $y = \sqrt{-x}$

B 7) $y = \sqrt{x + 3} + 2$

E 8) $y = \sqrt{x - 3} + 2$

D 9) Equation not Displayed

(#13-15) Describe the transformation on the parent function. Then, graph the function.

13) $y = \sqrt{x + 5} + 1$

$\leftarrow 5$
 $\uparrow 1$

14) $y = -\sqrt{x + 2}$

reflect over x-axis
 $\leftarrow 2$
